

Case Study Mazda Showroom - Mawson Lakes

Project Details

Client name

Palumbo

T: 08 8209 6100

E: info@palumbo.com.au

Start date

June 2016

Completion date

July 2016

Contract Type

URD

Contract value

Approximately \$100,000

Key Personnel

Contracts and Project Manager - Paul Williams

Estimator - Mario Franco

Site Supervisor - Russell McCarthy

Team Leader - Ian Watt

Enerven worked with Palumbo to a strict six week timeline to ensure the Mazda Showroom had power before it was set to open for business

The Customer

Palumbo are a South Australian, family owned company who have been part of the building industry for over 25 years. They have an extensive portfolio, which includes South Australian Government, Federal Government and a large number of private clients. They have a reputation for delivering projects to the highest quality, so they are particular about who they engage with on projects.

The Opportunity

In 2016, Palumbo started working on the design and construction of a brand new Mazda sales and service showroom at Mawson Lakes.

The project included the construction of an 883sqm showroom over two levels, 936sqm workshop with offices and a wash bay. Palumbo had a strict six week timeframe to complete this project. Enerven was tasked with the same timeframe to ensure the power was going to be available within the six week timeframe.

The Solution

Enerven worked with Palumbo to coordinate all supply and installation of the electrical infrastructure which will provide power to the showroom.

Enerven had to utilise their strong project management skills to coordinate this project to the strict timeline in place. The transformer required for this project was a non-standard transformer, and would not have been delivered and energised within the project deadline if the team weren't proactive in their

approach. The team were required to negotiate a transformer to be swapped in order to meet the tight deadline.

They had to be collaborative in their approach to this project and predict any potential issues that may cause a delay to progress and address them early. They were required to coordinate all civils and sub-contractors across the project to ensure all works were completed when required.

On site teams worked closely with Palumbo to develop plans and timeframes, that would prevent potential issues, whilst assiting the timing of other contractors to further prevent delays on completion dates set for the project.

Enerven successfully completed the project in the client's strict construction timeframe of 6 weeks, whilst adhering to Mazda's Design Guidelines.

Key Capabilities

This project shows Enerven's capability to deliver electrical infrastructure to a complex timeframe and strong project management skills to work proactively to ensure the strict project deadline was upheld.

Why Enerven?

Our experience in the market place, combined with the expertise and industry knowledge of our team, makes Enerven's offering second to none - which is why industry leaders such as Oz Minerals, Lendlease, AGL and BHP Billiton trust Enerven with their energy infrastructure assets.

We invest heavily in the best equipment and the professional development of our staff, which means we combine experience and history with innovation and technology to deliver solutions that address the evolving energy distribution requirements of the community.

With a strong supplier and partner network behind us, our highly skilled staff work closely with you to fully understand your specific needs and vision, and will tailor a solution to suit.

Delivering the highest standard of work in a safe and environmentally sustainable manner is our top priority, and we have an outstanding track record to prove it. We focus on building long-term relationships with our clients, we're committed to working with you for the lifecycle of your project and beyond.

Who We Are

Enerven, an SA Power Networks Company, provides a range of construction and maintenance services, including fibre installation, to clients both within SA and nationally. We believe innovations and technology will continue to drive efficiencies, but no more so than the experience, knowledge and capabilities of our people.
